

Pulse Eight Cec Adapter Specifications

- Control your TV, Amplifier and/or Blu-ray Player. Or, control from your TV remote, and condense all your remote controls into 1 device.
- This USB – HDMI-CEC Adapter works by connecting your home theatre PC to your home entertainment system's CEC bus.
- This is meant for use with one of the latest versions.
- Once connected, will automatically turn on and off your home theatre equipment and TV. Volume control from XBMC can be sent to your amplifier.
- You will be able to manage your DVD or Blu-Ray player from inside XBMC, and redirect the active source on your TV to whichever equipment needs it, all from one remote control!
- No line of sight is required and cables can be hidden neatly out of sight. About HDMI-CEC: CEC (Consumer Electronics Control) is the control protocol found in HDMI.
- You may have heard of CEC in another form: BraviaLink, Simplink or Anynet+ are a few other names depending on the brand.
- This adapter allows your HTPC to join that communication channel. Currently, almost all graphics cards do not support CEC in any form, and others only in a limited form.
- This device allows software and libCEC to access the CEC communications link and send and receive control messages.

- How CEC works for you: The USB – CEC Adapter allows to turn your TV and other attached equipment on and off (if they support HDMI CEC) adjust the volume or eject the disk from a drive, start playback, etc.
- Likewise these same devices can tell what to do. For example, your TV remote can also control, or vice versa.
- This device means less clutter and an easier remote for simple control.
- Compatibility: Our technology works on all versions of HDMI, including HDMI 2.0a we don't interfere with the video signal in any way ,
- Compatible with Windows, Linux (including OpenELEC) and Mac OS X
- PN: P8-USBCECv1
- Item Weight 0.16 ounces
- Product Dimensions 1.97 x 1.18 x 0.79 inches

- Item Dimensions LxWxH 1.97 x 1.18 x 0.79 inches

- Color Black
